A Computer Science student at BHU ( Banaras Hindu University, Varanasi ) i'm interest in **Frontend Development** and **Backend Development** and **Problem Solving** skill.

## Education

|                                                                                                                       |                      |
|-----------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Banaras Hindu University, Varanasi U.P.( BHU )</b> , Master's of Computer Application<br>• GPA: 6.7/10.0 (Present) | Oct 2023 – June 2025 |
| <b>Govt. Digvijay College, Rajnandgaon C.G</b> , Bachelor's of Computer Application<br>• Percentage : 76.00%          | July 2019 – May 2022 |
| <b>Shri Gurunanak H.S. School, Rajnandgaon C.G</b> , PCM<br>• Percentage : 60.80%                                     | July 2018 – May 2019 |

## Projects

|                                                                                                                                                                                                                                                              |                    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Recipe Haven with Django</b><br>• Recipe Haven , a website that allows their all the user to share their delicious taste by performing CURD operation and authorize the user using django power.<br>• Tools Used: HTML5, Bootstrap5, Python, Django.      | <b>Github Link</b> |
| <b>Weather App</b><br>• Developed a dynamic weather app , Demonstrated skills in frontend development, state management, and API integration.<br>• Tools Used: HTML5, CSS3, JavaScript, React js, API.                                                       | <b>Github Link</b> |
| <b>Password Generator</b><br>• A user-friendly and efficient password generator that provides users with secure and complex passwords. The tool will help promote good password hygiene and enhance online safety.<br>• Tools Used: HTML5, CSS3, JavaScript. | <b>Github Link</b> |

## Technical Skills

**Programming Languages:** Python, C++ , C, Java, JavaScript, SQL, MySQL, MongoDB

**Frameworks and Libraries:** React Js, Django, Node js, Express js

**Tools and Software:** Git, GitHub, Jupyter Notebook, PyCharm, IntelliJ idea.

## Course work/Soft Skills

DSA | OOP's Concepts | DBMS | Computer Networks | Software Engineering | Operating System | ANN  
Image Processing | Problem-solving | Web Development | Machine Learning

Windows OS | Linux OS

## Codeing Platforms

LeetCode | HackerRank | Coding Ninjas

## Certifications

**Programming in Mordern CPP :** NPTEL

**Object Oriented Programming (OOPs) in Java :** Coding Ninjas

**The Joy of Computing using Python :** NPTEL

**Software Engineer Intern :** Hacker Rank
